Smart Lead Management SaaS for Home Service Businesses ———— Aug 2024 – Apr 2025

Built and deployed a cross-platform mobile app (Flutter, FastAPI, Google Maps API) that integrated with the Jobber API to manage real-time customer leads; supported 20+ active users and generated 359 in monthly recurring revenue (MRR).

Standard Activities: Collaborated in a 3-person founding team

adapting through pivots; gained firsthand experience in agile development, technical ownership, and startup operations.

Led backend development using Docker, PostgreSQL, and OAuth2 authentication; deployed to Hetzner VPS with CI/CD via SSH and Docker Compose.

Implemented deep linking and Firebase hosting for Android/iOS, learning and applying Supabase and advanced data handling under startup constraints.

Key lessons: importance of aligned team values, clear documentation, and building with user feedback early. Experience inspired the launch of a second SaaS business post-graduation.
